

Press release

Großräschen battery storage project reaches new milestone

(Dresden, June 26, 2025) TRICERA energy, the general contractor (EPC) and system integrator for large-scale battery storage systems, can announce a new partial success in the battery storage project in Großräschen in southern Brandenburg. In addition to successfully securing the project areas, planning permission was also recently granted. This means that construction of the storage facility can now begin.

The battery storage project, which is being driven forward by the company's in-house project development department with the help of an investor, has thus reached another milestone.

The storage facility has a nominal capacity of 35 MWh and an output of 11.4 MW and is to be marketed for balancing power and energy trading after completion.

TRICERA energy GmbH is delighted with the successful progress of the project and looks forward to continuing its successful cooperation.

Hintergrund TRICERA energy

To a new era – that is the vision of TRICERA energy GmbH. The sustainable company based in Freiberg and Dresden specializes in the development, construction and operation of large (>2 MWh) battery storage systems, thus enabling an optimized, demand-oriented and renewable energy supply. The core business comprises four areas of expertise: Engineering and consulting, project development, system integration as well as O&M. With 90 employees consisting of leading experts in the battery industry and many years of experience in various fields of expertise, TRICERA energy is a qualified partner when it comes to the energy transition. To date, TRICERA has installed 280 megawatt-hours of capacity and 152 megawatts of power.
